Every project we undertake is a journey of innovation, collaboration, and success.

ABOUT US

A Brief Story About The Company

QllmSoft is a trusted technology partner, delivering advanced **web development**, mobile app creation, and **custom enterprize-level software solutions** designed to boost efficiency and accelerate growth. Established in **2015**, our mission has been clear, to help businesses adapt, compete, and excel in today's rapidly evolving digital world.

CORE SERVICES

Custom Software Development

Building unique applications tailored to specific business needs.

Web & Mobile Apps

Developing responsive web applications and native/cross-platform mobile apps (iOS/Android).

Enterprise Solutions

Creating complex systems for large organizations, including ERP, CRM, etc..

Cloud Development

Building SaaS products and cloud-based applications.

TECH STACK

Our technology stack is carefully chosen to build secure, scalable, and high-performance digital products.

01

Backend

C#, ASP.NET Core, Web APIs (REST/gRPC), SignalR, Microservices, Entity Framework.

02

Frontend

React, Next.js, Angular, Blazor (MudBlazor, Redzen), Tailwind CSS, Material UI, responsive SPAs.

03

Databases

SQL Server, PostgreSQL, MySQL, SQLite, Redis; ORM (EF Core, Dapper)

04

Architecture

Clean Architecture, Best Practices, DDD, CQRS, Microservices, event-driven systems.

05

Tools & Deployments

Docker, Kubernetes, GitHub Actions, Azure & AWS Services.

06

Cloud & DevOps

Azure, AWS, AKS/EKS, CI/CD, Infrastructure as Code, monitoring.

OUR PROJECTS

01 FINANCIAL ANALYSIS WEB APPLICATION

An intelligent financial platform for SMEs featuring budgeting, real-time analytics, expense tracking, and integration

FEATURES

CRM Integration: Strengthen client relationships and retention.

Investment Tracking: Analyze and monitor portfolios with ease.

Secure Gateways: Enable encrypted transactions and auto-payments.

Reporting & Analytics: Real-time insights for data-driven decisions.

The Finance Management System by QllmSoft simplifies business finances through real-time analytics, automated budgeting, and seamless connectivity with tools like QuickBooks and Xero.

Built using modern technologies like .NET Core and Angular, it's more than just accounting software—it's a strategic tool for growth.

OUR PROJECTS

02

DOCUMENT CONTROLLER – SECURE & INTELLIGENT DMS

QllmSoft's Document Controller is an advanced, cloud-enabled Document Management System that simplifies complex document workflows, improves compliance, and ensures data security.

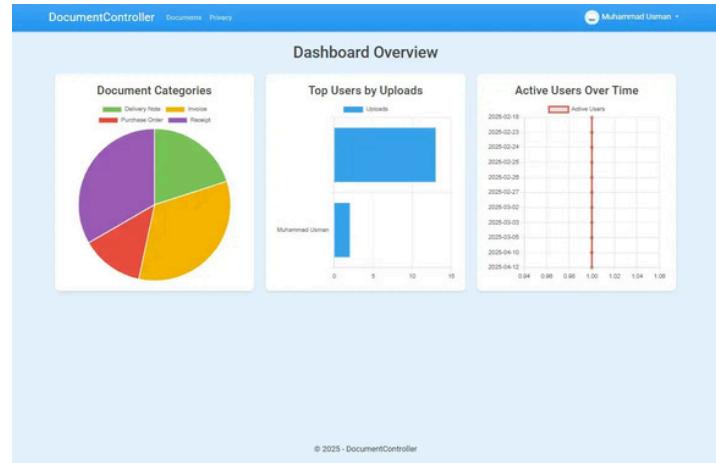

FEATURES

Lifecycle Automation: Seamlessly manage document stages.

Role-Based Access: Secure files with granular control.

Smart Audit Trails: Full visibility over revisions.

Azure Cloud Storage: Safe, scalable, and encrypted.

With built-in API integration, customizable access levels, version tracking, and automated workflow triggers, this intelligent DMS reduces manual tasks and supports audit readiness for industries like finance, healthcare, and legal.

Includes real-time document sharing, version tracking, smart tagging, template creation, and cloud-based encryption for secure storage and access.

OUR PROJECTS

03 HR MANAGEMENT SYSTEM

Our tailored HR Management System empowers organizations to automate core human resource functions, from attendance tracking and leave approvals to payroll processing and employee evaluations.

FEATURES

Employee Attendance Tracking: Real-time attendance monitoring with detailed reports for better workforce management.

Leave Management System:

Streamlined leave application, approval, and tracking with minimal admin effort.

Salary Calculation & Payroll:

Automated payroll with benefits, deductions, and tax compliance.

HR solutions drastically reduce administrative overhead, ensure payroll accuracy, and improve compliance.

Our HR platforms include attendance tracking, leave and payroll automation, performance reviews, and insightful HR analytics—all integrated into a single interface for better control and efficiency.

OUR PROJECTS

04

WAREHOUSE & INVENTORY AUTOMATION

Our warehouse automation solutions help factories and manufacturing companies take full control of their inventory, stock movement, and daily warehouse operations.

FEATURES

Stock Visibility: Know exactly what is available, reserved, damaged, or out of stock at any time.

Controlled Stock Movement: Track inward, outward, transfers, and adjustments with full accountability.

Role-Based Operations: Every warehouse action follows approval rules defined by your company SOPs.

Business Reports: Generate clear stock summaries, usage history, and audit-ready reports.

Multi-warehouse control, stock-level alerts, approval-based operations, and clear reporting — all designed according to your factory's internal workflows and operational structure.

ACHIEVEMENTS

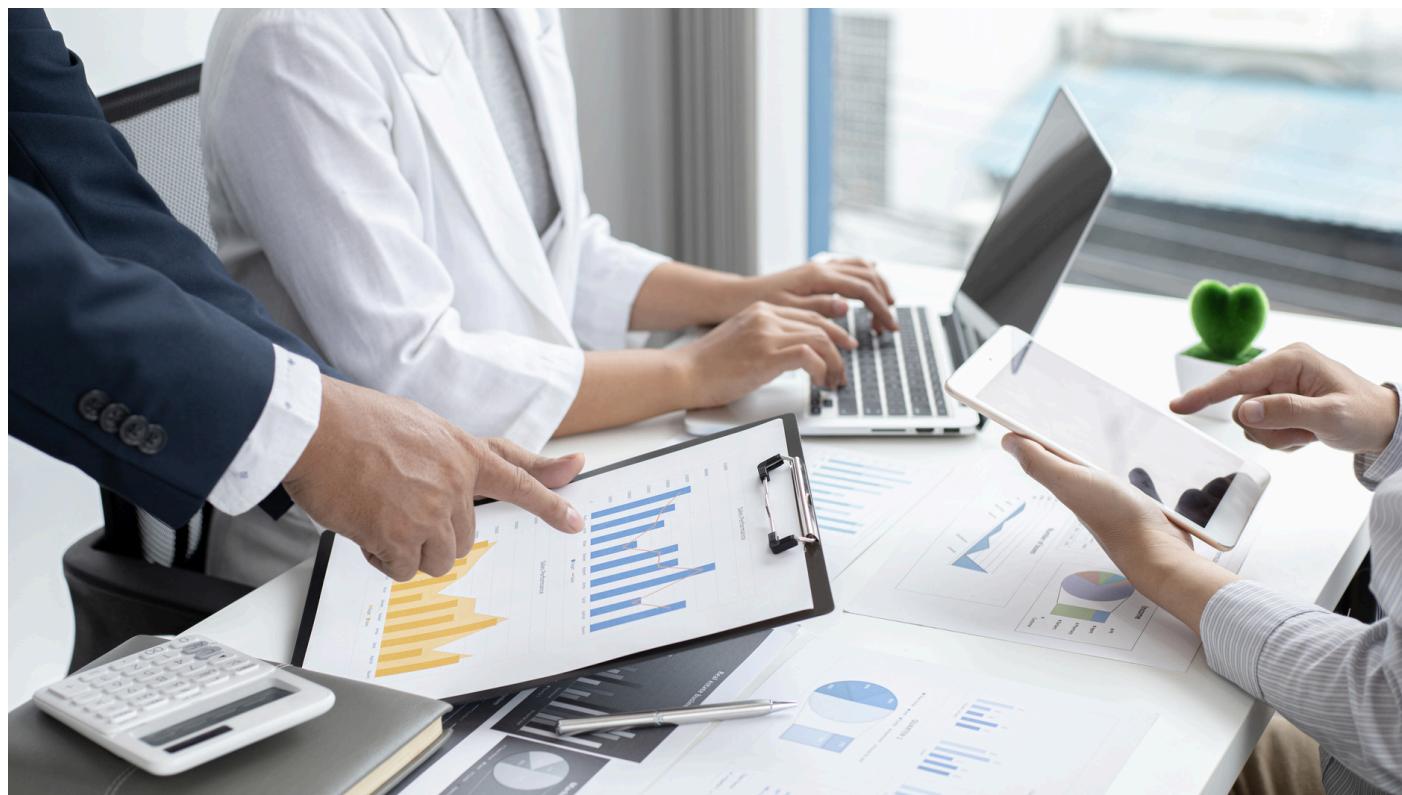

Helped clients streamline processes and achieve measurable business outcomes through effective digital solutions.
